

R - OIL & GAS PIPELINES

The following map was obtained from the Michigan Public Services Commission of the Department of Labor and Economic Growth. This map, located on the State of Michigan's official web site, shows the major petroleum pipelines traversing the lower peninsula of Michigan. Macomb County has an 8-inch Sun pipeline running through the center of it. There are no other pipelines indicated.

The second map shows the major gas pipelines and storage fields located throughout the State of Michigan. Macomb County has a number of gas companies with pipelines running within its borders. Some of these companies include MichCon, Consumers Energy, and Vector. Documenting the types of lines and their ownership can greatly help in identifying potential problematic areas for future development.

Petroleum Product Pipelines in Michigan

There are no pipelines in the Upper Peninsula
